

Agency WCAG Audit Demo accessibility scan

Automated WCAG scan powered by axe-core. Scanned 3 page(s) across 3 requested site(s).

This automated report identifies issues detectable by the configured axe-core rules. Automated testing cannot evaluate every accessibility requirement and does not establish legal or WCAG conformance. Manual testing by qualified people, including assistive-technology testing, may still be required.

Limitations and metadata

This automated report identifies issues detectable by the configured axe-core rules. Automated testing cannot evaluate every accessibility requirement and does not establish legal or WCAG conformance. Manual testing by qualified people, including assistive-technology testing, may still be required.

Scan started: 2026-06-24T09:39:19.705Z. Scan finished: 2026-06-24T09:39:27.155Z.
Standards: WCAG_2_0, WCAG_2_1, WCAG_2_2. Level: AA.

Automated risk score is not a compliance score. It is a deterministic prioritization signal based on axe impact and affected-node counts.
